

IN THE DRAWINGS:

In the Office Action at item 3, the proposed drawing corrections filed on March 17, 2003 were approved and proper corrected drawings were required. These corrections associate reference characters with parts of the invention such as (a) the operating surface and the seat in claim 3; and (b) the axis in claim 4. Thus, a replacement sheet for the figure (FIG. 1), incorporating the approved corrections, is submitted herewith.
